## PEB (PRE ENGINEERED BUILDINGS)

Pre-engineered buildings (PEBs) are structures that are designed, fabricated, and assembled using standardized components and building systems. These buildings are created to meet specific requirements and are typically designed off-site before being transported and assembled at the construction site. Pre-engineered buildings are known for their efficiency, cost-effectiveness, and quick construction time compared to traditional building methods.

### Why to go with PEB ?

- ▷ Standardized components
- ▷ Cost-effectiveness
- ▷ Design flexibility
- ▷ High-quality materials
- ▷ Reduced environmental impact
- ▷ Versatility

# PEB (PRE ENGINEERED BUILDINGS)

**PROFACIL**  
INDUSTRIAL SERVICES PRIVATE LIMITED

The basic parameters that define a pre-engineered building are:

- Building Width
- End bay Spacing
- Building Length
- Interior bay Spacing
- Building Height
- Design Loads
- Roof Slope
- Ancillary service areas required

Tapered Column Clear Span (TCCS)

Multi Gable (MG) I / II

Multi Span I

Clear Span with Crane

Multi Span II

Mono Slope

Multi Span III

Lean - To

Multi Span I with Crane & Mezzanine

MEP consultants are specialist engineers who provide advice and solutions for building systems, including: heating, ventilation, air conditioning, plumbing, and electrical systems
